

SUHAE RADIANCE HAND SHOWER

Product Overview

The **SUHAE Radiance Hand Shower** is designed to enhance your daily shower with stronger water pressure and a wider spray for a more refreshing experience.

Featuring a **Vitamin C filtration system**, it helps neutralise chlorine and reduce impurities commonly found in tap water, creating a gentler shower environment for skin and hair.

By supporting the skin's natural moisture balance, **Radiance** helps minimise dryness and leaves skin feeling softer, smoother, and refreshed after every shower.

Key Benefits

- Helps reduce chlorine and impurities in shower water
- Supports healthier-looking skin and scalp
- Helps reduce dryness caused by harsh water
- Promotes smoother and softer hair
- Delivers a wider, more comfortable spray coverage
- Boosts water pressure for a refreshing shower experience
- Generates negative ions for a revitalising shower environment

SKIN- FRIENDLY SHOWER EXPERIENCE

Designed with skin in mind, the SUHAE Radiance Hand Shower helps create a gentler shower environment by reducing impurities commonly found in tap water.

This supports the skin's natural moisture balance, helping minimise dryness and irritation while leaving skin feeling softer, smoother, and more refreshed after every shower.

The SUHAE Water Technology

SUHAE combines three technologies to improve both water quality and shower performance.

Aera™ Flow

Patented micro-jet spray plate that increases water pressure and spray balance.

Vitae™ Infusion

25,000 mg Vitamin C neutralises chlorine to create gentler water for skin and hair.

Purea™ Core

Ceramic bead and micro-fabric filtration help refine water and capture fine particles.

Scent Selection

Ocean Calm

A light aquatic scent inspired by the ocean breeze, creating a refreshing and peaceful shower atmosphere.

Baby Powder

A soft, comforting powdery scent that brings a clean and gentle feeling to your daily shower routine.

Soft Citrus

A delicate citrus blend that brightens your mood and leaves the shower feeling fresh and uplifting.

Citrus Bloom

A vibrant combination of lemon and mango that adds a sweet and energizing citrus aroma.

White Jasmine

An elegant floral fragrance that fills the shower with a calm and soothing scent.

Blush Rose

A soft romantic rose scent that creates a luxurious and refreshing shower experience.

Forest Pine

A cool pine fragrance that brings the refreshing feeling of nature into your bathroom.

Cool Eucalyptus

A crisp eucalyptus aroma that helps create a revitalizing and refreshing shower moment.

Forest Calm

Inspired by the natural scent of forest air, providing a relaxing and peaceful environment.

Pure (Unscented)

A fragrance-free option designed for those who prefer a clean shower experience without added scent.

Vitamin C Infusion

**Concentrated essence of 300 lemons.
Infused with aromatic oils.**

Refines. Softens. Illuminates.

**A daily ritual of pure clarity— revealing skin that feels supple,
smooth, and effortlessly radiant.**

Vitamin C Water

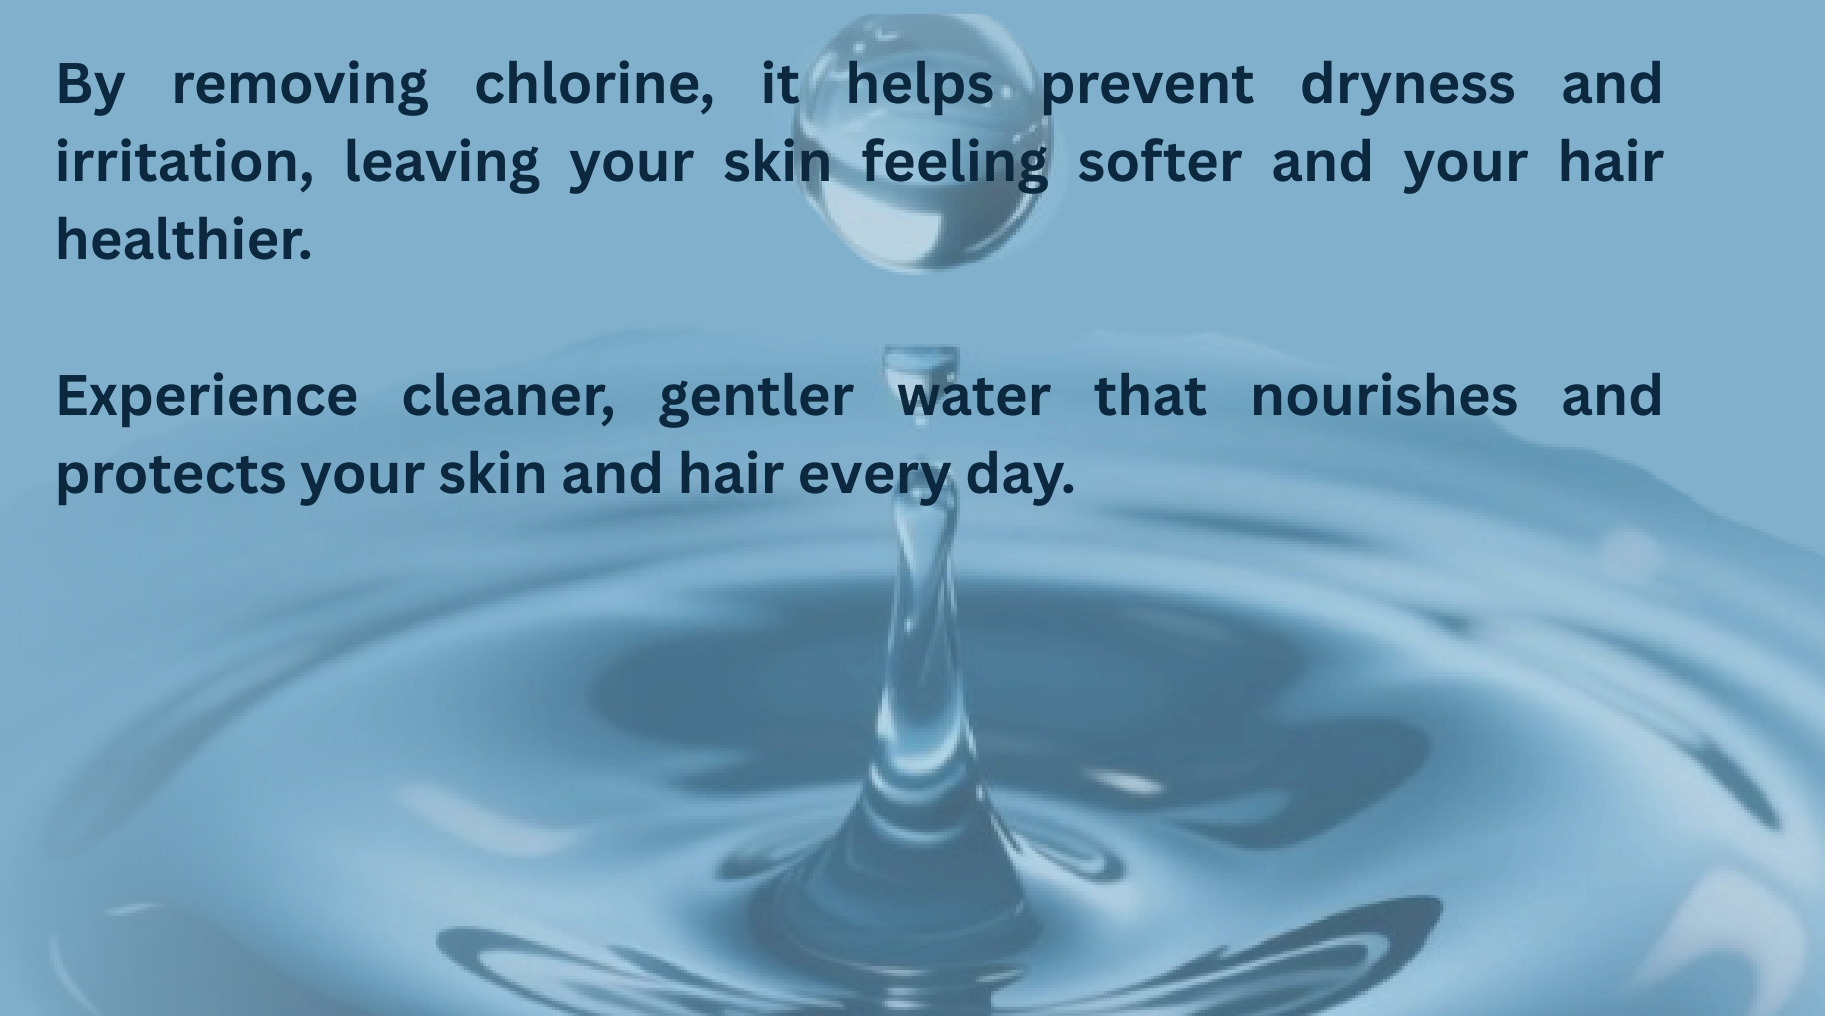

Residual Chlorine-free Water

Effectively Removes Residual Chlorine

**Our filtration system eliminates residual chlorine from
your tap water, restoring its natural purity.**

**By removing chlorine, it helps prevent dryness and
irritation, leaving your skin feeling softer and your hair
healthier.**

**Experience cleaner, gentler water that nourishes and
protects your skin and hair every day.**

CHLORINE REMOVAL TEST

STEP 1

A chlorine detection reagent is added into tap water.

STEP 2

The water turns yellow, showing the presence of chlorine.

STEP 3

When the water passes through the SUHAE Vitamin C filter, the yellow color fades.

STEP 4

The water becomes clear again, demonstrating effective chlorine neutralization by SUHAE.

Vitamin C is widely recognized for its ability to neutralize chlorine in water.

**Yellow color =
Containing chlorine**

**Transparent =
No chlorine**

WATER SAVING PERFORMANCE

Smart Water Efficiency

The SUHAE shower head is designed with a precision micro-spray plate that optimizes water flow while reducing overall water consumption.

This advanced spray technology can help save up to 30,000L of water per year, compared to conventional shower heads.

At the same time, the concentrated spray design enhances water pressure, delivering a soft, smooth, and comfortable shower experience without harsh splashing

ANTI-BACTERIAL PURIFICATION SYSTEM

ANTI-BACTERIAL CERAMIC BOWL

The anti-bacterial ceramic bowl filter prevents germs and bacterial from forming in tap-water.

Microfabric filters removes contaminants, rust, dust, and foreign matters in tap-water.

* The anti-bacterial ceramic bowl can be used semi-permanently

MICROFABRIC FILTER

Designed to gently remove impurities, rust, dust, and other particles from your tap water, delivering a cleaner, softer shower experience. The microfabric filter is easily replaceable by opening the shower head.

For optimal performance, replace the filter after several months of use or sooner if it shows signs of accumulation.

STRONG WATER PRESSURE

Engineered to use less water while boosting pressure up to 500% stronger than a conventional shower head.

The enhanced spray angle provides wider and more even coverage, helping water flow more gently across the skin for a refreshing shower that leaves skin feeling cleaner, softer, and revitalised.

STRONG IONS SHOWER

Negative Ions

The ultra-fine spray plate generates over 400,000 negative ions, delivering a refreshing shower that helps leave skin feeling cleaner and revitalised.

Often called the “vitamins of the air,” negative ions are known to support cell metabolism, boost vitality, reduce fatigue, and promote an overall sense of freshness and well-being.

EASY MAINTENANCE

Radiance features a detachable spray plate that allows convenient cleaning and descaling.

This helps prevent mineral buildup and ensures consistent water pressure and spray performance, keeping your shower experience refreshing over time.

COMPONENTS

- 1 Head housing
- 2 Handle
- 3 SUHAE Vit C filter
- 4 Antibacterial filter
- 5 Microfabric filter
- 6 Water cap O-ring
- 7 Spray plate
- 8 Water cap
